

DEPARTMENT OF THE AIR FORCE  
18TH CIVIL ENGINEERING SUPPORT SQUADRON (PACAF)  
APO SAN FRANCISCO 96239

DEC 19 1978

REPLY TO:  
ATTN OF:

DEIE (Mr. Okuhama, 43145)

SUBJECT:

Boundary Survey and Staking of USAF Installations

TO:

Mr. Akira Suzuki  
Director, Facilities Division  
Naha Defense Facilities Administration Bureau

1. Reference is made to your letter AFA No. 618, 4 December 1978, subject: Request for Permission to Conduct Field Survey of Boundary Lines and Posting Stakes within the US Forces Facilities and Areas.

2. We appreciate the significance of this program and fully support its successful completion. It is our understanding that the survey and staking will be based on the boundary lines delineated in red on the maps previously furnished and that any changes deemed necessary can be negotiated at the sites.

3. Recommend a joint visual survey of the proposed boundary areas be conducted prior to or on the initial day contract starts and another immediately upon contract completion. In order that we may timely schedule USAF representation, contract schedule for each installation should be provided this office as soon as possible. The survey schedules should be prepared to allow participation by the same USAF representative on all USAF installations.

4. Your requests for permission to enter various USAF installations by DFAB and contractor personnel should be submitted at least two weeks in advance.

**SIGNED**

JAMES B. CULPEPPER  
Chief, Industrial Engineering

Cy to: 18CSG/CC  
400MMS/CC  
6135ABS/CC  
Det#1, 18CSG/CC  
Chief, FBIS

H/R - DFAB's current program covers surveying of the following facilities:  
Ie Shima Auxiliary Airfield, PAC 6005  
Kadena Ammunition Storage Area, PAC 6022  
→ Senaha Communication Station, PAC 6023  
Makimino Housing Area, PAC 6061

Installation commanders will be furnished a copy of the schedule upon receipt from DFAB. DFAB plans are to negotiate in December and issue notice to proceed in early January 1979.
